

Procedure to Re-Validate Digital Signature in Form16

When an Digital Signature which is appearing in Form16 has been wrongly validated the system will not allow to re-validate the Signature. In this situation user has to remove the wrongly validated signature from the system to successfully revalidate the Digital Signature (DS). Below are the steps to re-validate the DS.

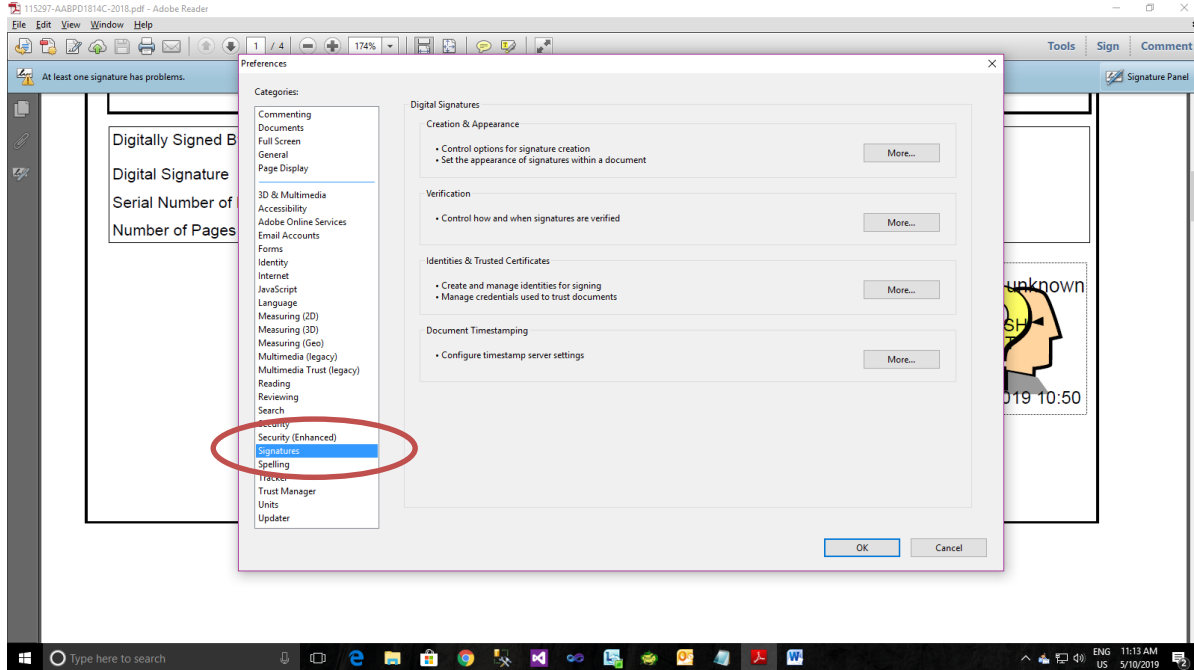

Step 1 :

Select the option "Preferences" under the "Edit" menu from the Adobe Acrobat.

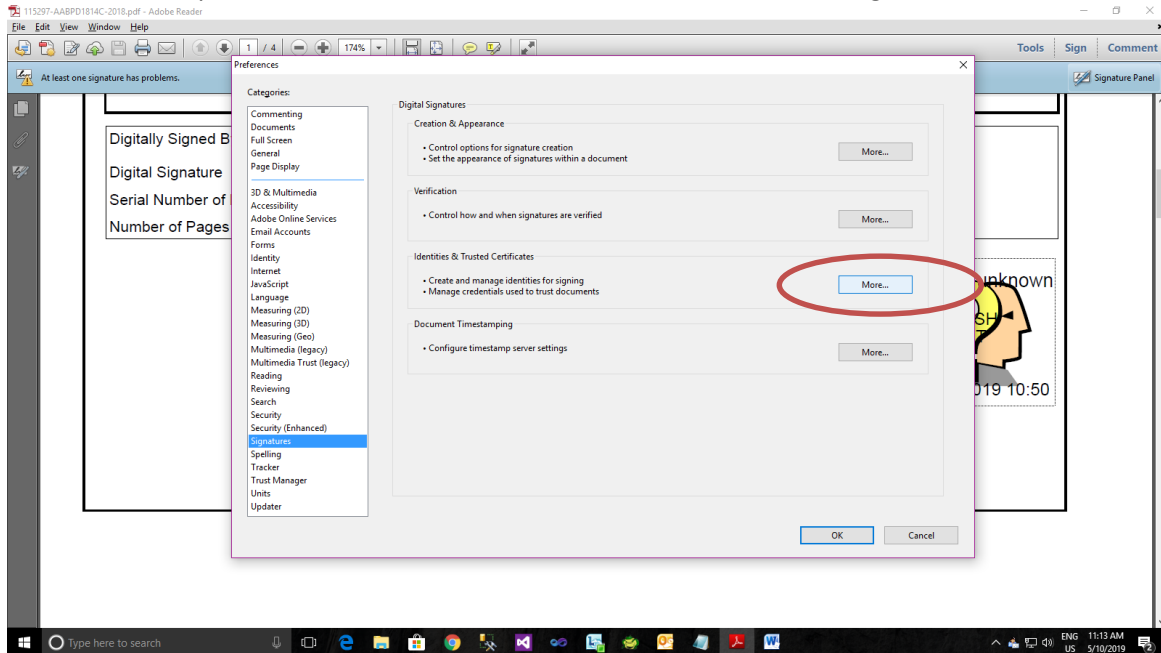

Step 2 :

Select **“Signatures”** which appears on the left side drop list.

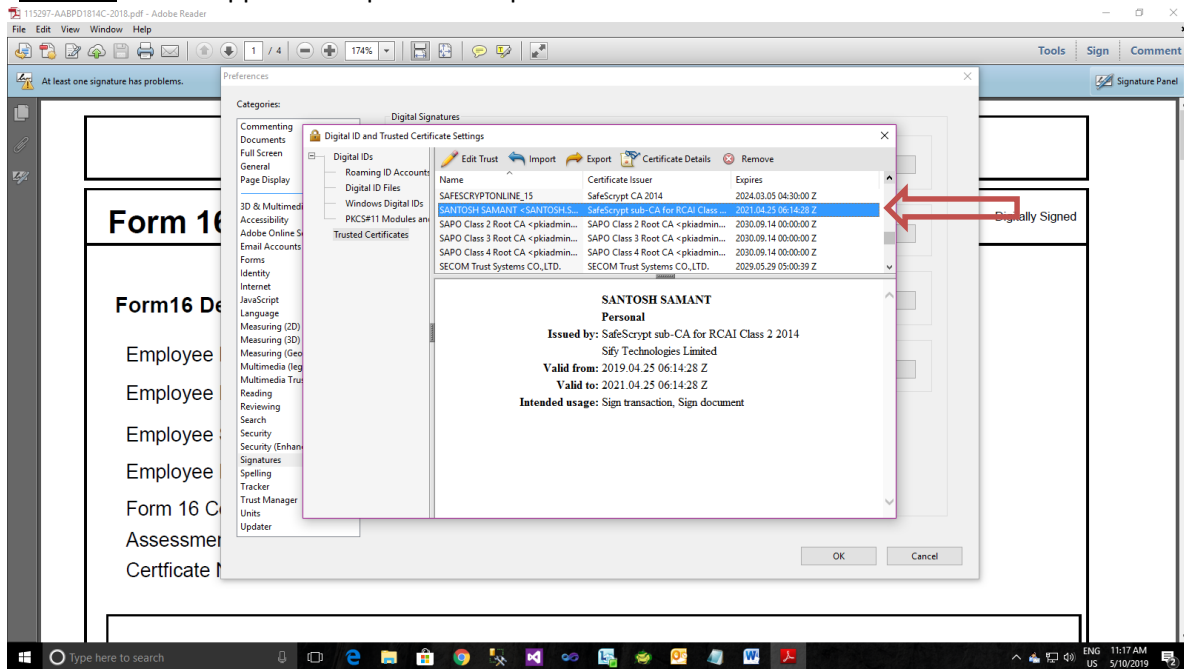

Step 3 :

Select **“More”** option from **“Identities & Trusted Certificates”** from the right side.

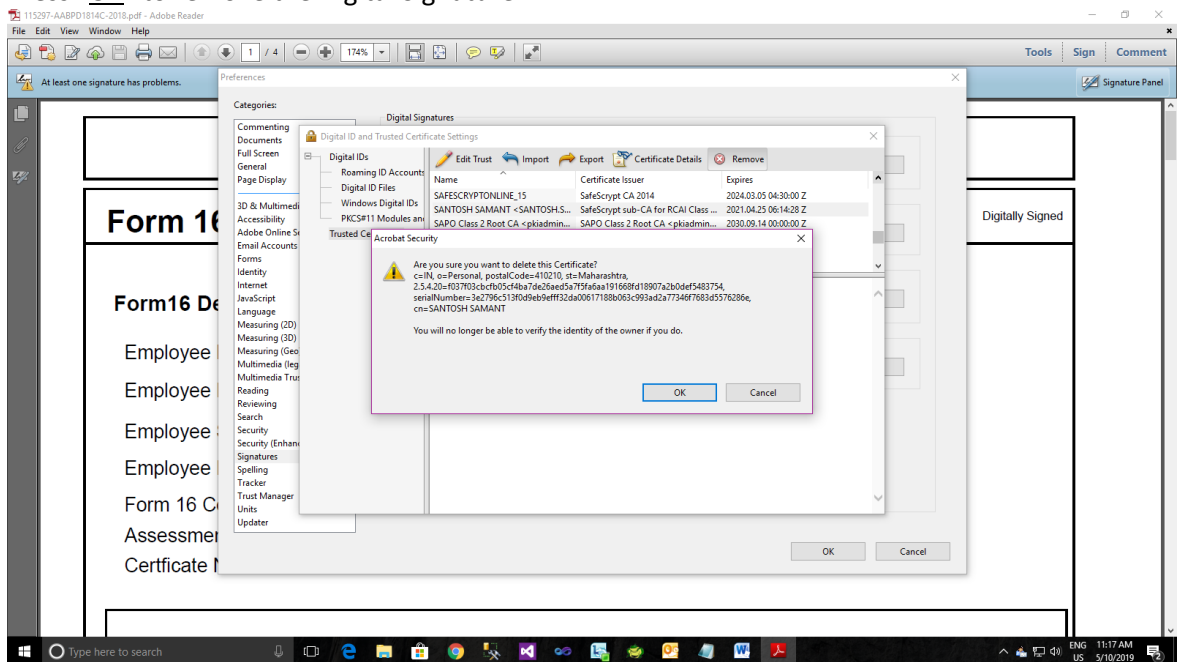

Step 4 :

Select the proper Digital Signature which appears on the right side drop list. Then select the option “Remove” which appear on top of the Drop list.

Step 5 :

Press “OK” to remove the Digital Signature.

After following these steps then the user has to follow the document to validate the Digital Signature.
